Course Outline :: PSPO::

Module Title	:	Professional Scrum Product Owner (PSPO)
Duration	:	2 days

Overview

The **Professional Scrum Product Owner (PSPO)** course is on how to maximize the value of software products and systems. Product Ownership in Scrum requires more than knowledge of how to write user stories or manage a Product Backlog. Professional Scrum Product Owner is a cutting-edge course for Product Owners, Agile product managers and anyone responsible for a software product's success in turbulent markets.

The PSPO course addresses a significant skill gap in the software development industry that we have seen growing over the last few years. An effective Product Owner is one of the best predictors of product success, but many Product Owners seem to misunderstand the breadth of the role's responsibilities in delivering a successful product. Maximizing Return on Investment (ROI), optimizing Total Cost of Ownership (TCO), and capitalizing on product Agility are the things a Product Owner is intimately concerned with that the PSPO course focuses on.

Who should attend?

The Professional Scrum Product Owner course is for anyone involved in software development using the Scrum Framework. It is particularly beneficial for those people within an organization accountable for maximizing the value of work done by Development team, including Product Owner, Product Manager and Leadership Team.

Course Topics

The training focuses on the fundamentals that are essential for understanding and satisfying the role of the Product Owner in the context of product management and Scrum. The course not only provides greater understanding of the role itself, but also gives you a clearer idea of the principles of agile project management by the Product Owner.

You will learn:

- Scrum Framework
- Scrum Roles – Product Owner, Scrum Master and Development Team
- Agile Product Management
- Value-Driven Development
- Product Backlog Management
- Release Management
- Relevance of epics, user stories and acceptance criteria

Iverson Associates Sdn Bhd (303330-M)

Suite T113 – T114, 3rd Floor, Centrepoint, Lebuh Bandar Utama
Bandar Utama, 47800 Petaling Jaya, Selangor Darul Ehsan
Tel: 03-7726 2678   Fax: 03-7727 9737   Website: www.iverson.com.my

Course Outline :: PSPO::

- Setting and achieving strategic product goals
- Release strategies and planning with Scrum
- Estimating and prioritizing requirements
- Forecasting capability with Scrum
- Product development involving multiple teams
- Total cost of ownership

Teaching techniques

Complete hands-on workshop to deal with organizational challenges and implantation issues. Participants learn by doing and training facilitator focuses on individual and interaction than theory. Participants work in small teams to learn and play all the roles to understand importance of Scrum Team.

MORE INFORMATION

The 2-day **Professional Scrum Product Owner** course covers the principles and (empirical) process theory underpinning the Scrum Framework, and the role of the Product owner in it. This course is a combination of instruction and team-based exercises and teaches what is at the heart of the Scrum and Agile movement.

PSPO is the cutting-edge course for effective Product Owners and for anyone working as part of product management team toward maximizing value of work. The course includes advanced thinking for product ownership and behavioral shifts.

Scrum.org maintains the defined curriculum and materials taught by our 160+ Professional Scrum Trainers (PSTs) to assure consistency and quality for students worldwide.

Prerequisites

Attendees will be able to make the most of the class if they:

- Have studied the Scrum Guide (required)
- Have taken the Scrum Open (free online assessment)
- Have taken the Professional Scrum Foundations course, or have experience on or exposure to a Scrum Team
- Possess a general understanding of requirements and requirements decomposition
- Have been on or closely involved with a project that builds or enhances a product
- Want to know more about how Scrum works, how to use it, and how to implement it in an organization
