Course Outline :: Exam Readiness: AWS Certified DevOps Engineer – Professional::

Module Title : Exam Readiness: AWS Certified DevOps Engineer – Professional

Duration : 1 day

Description

The AWS Certified DevOps Engineer – Professional exam validates technical expertise in provisioning, operating, and managing distributed application systems on the AWS platform. Join this full-day, advanced-level course to learn how to prepare for the exam by exploring the exam's topic areas and how they map to DevOps on AWS and to specific areas to study. We will review sample exam questions in each topic area and teach you how to interpret the concepts being tested so that you can more easily eliminate incorrect responses. This course covers the core principles of the DevOps methodology and examines a number of use cases applicable to startup, small- and medium-sized business, and enterprise development scenarios.

Learning Objectives

This course teaches you how to:

- Prepare for the AWS Certified DevOps Engineer Professional exam.
- Implement and manage continuous delivery systems and methodologies on AWS.
- Understand, implement, and automate security controls, governance processes, and compliance validation.
- Define and deploy monitoring, metrics, and logging systems on AWS.
- Implement systems that are highly available, scalable, and self-healing on the AWS platform.
- Design, manage, and maintain tools to automate operational processes.

Intended Audience

This course is intended for:

- DevOps engineers
- Solutions architects
- Systems administrators

Prerequisites

We recommend that attendees of this course have the following prerequisites:

- A current AWS Certified Developer Associate or AWS Certified SysOps Administrator Associate certification
- Good working knowledge of AWS core services

Suite T113 – T114, 3rd Floor, Centrepoint, Lebuh Bandar Utama Bandar Utama, 47800 Petaling Jaya, Selangor Darul Ehsan
