

Module Title : AWS Certification Exam Readiness Workshop – Professional Level

Duration : 1 day

Intended Audience

This course is intended for:

- Individuals who are preparing to take the AWS Certified Solutions Architect – Professional exam

Prerequisites

We recommend that attendees of this course have:

- Attended Advanced Architecting on AWS
- Achieved AWS Certified Solutions Architect – Associate
- Two or more years hands-on experience designing and deploying cloud architecture on AWS
- Abilities to evaluate cloud application requirements and make architectural recommendations for implementation, deployment, and provisioning applications on AWS
- Capabilities to provide best practices guidance on the architectural design across multiple applications, projects, or the enterprise.

Bring Your Own Device

Please note that this class requires you to bring your own device. Plan to come to class with the following:

- A notebook computer with Wi-Fi (labs cannot be completed on an iPad or tablet device)
- Administrator access to the computer, if Windows
- Chrome, Firefox, or Safari
- Smart device / tablet to access course literature (optional)

Course Description

Designed to complement Advanced Architecting on AWS, this full-day workshop is intended for individuals preparing for the AWS Certified Solutions Architect – Professional exam. The workshop provides an overview of the concepts and knowledge areas covered on the exam and walks you through the exam structure and question formats. Labs provide hands-on practice with advanced use cases, while practice exam questions test your understanding of key architectural concepts. At the end of the workshop, you'll also receive a voucher to take an additional online practice exam at no cost.

Course Objectives

This course teaches you how to:

- Understand the content domains and how AWS services map to them
- Combine multiple AWS services to solve complex architectural requirements
- Understand advanced concepts of core AWS services and associated use cases
- Identify how questions are written to test AWS architectural concepts

Course Outline

This course covers the following concepts:

- Introduction to content domains and exam structure
- Detailed discussion of content domains
- Hands-on labs to reinforce specific use cases
- Example questions and scenarios for group discussion
- Practice exam questions
